

Equimax Oral Gel for Horses

Authorised

- Ivermectin
- Praziquantel

Product identification

Medicine name:

Equimax oral gel for horses
Equimax Oral Gel for Horses

Active substance:

Ivermectin
Praziquantel

Target species:

Horse

Route of administration:

Oral use

Product details

Active substance and strength:

Ivermectin
18.70 milligram(s) / 1.00 gram(s)
Praziquantel
140.30 milligram(s) / 1.00 gram(s)

Pharmaceutical form:

Oral gel

Withdrawal period by route of administration:**Oral use:**

-

Horse

- Meat and offal. 35 day

Anatomical therapeutic chemical veterinary (ATCvet) codes:

QP54AA51

Legal status of supply:

Veterinary medicinal product subject to veterinary prescription

Authorisation status:

Valid

Authorised in:

United Kingdom (Northern Ireland)

Available in:

United Kingdom (Northern Ireland)

Package description:

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 7.49 grams of product and is fitted with variable dose capacity.Product presentations:Box of 48 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 7.49 grams of product and is fitted with variable dose capacity.Product presentations:Box of 40 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 7.49 grams of product and is fitted with variable dose capacity.Product presentations:Box of 12 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 7.49 grams of product and is fitted with variable dose capacity.Product presentations:Box of 2 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 7.49 grams of product and is fitted with variable dose capacity.Product presentations:Box of 1 syringe or Blister of one syringe.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 6.42 grams of product and is fitted with variable dose capacity.Product presentations:Box of 48 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 6.42 grams of product and is fitted with variable dose capacity.Product presentations:Box of 40 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 6.42 grams of product and is fitted with variable dose capacity.Product presentations:Box of 12 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 6.42 grams of product and is fitted with variable dose capacity.Product presentations:Box of 2 syringes.

An adjustable multidose syringe consisting of high density polyethylene (white) and low density polyethylene (white).The syringe contains 6.42 grams of product and is fitted with variable dose capacity.Product presentations:Box of 1 syringe or Blister of one syringe.
