2. NAME OF THE VETERINARY MEDICINAL PRODUCT
KENOSTART
KENODIP 3000
3 mg/g Teat Dip Solution for cattle (dairy), Iodine

3. STATEMENT OF THE ACTIVE SUBSTANCE AND OTHER INGREDIENT
Available Iodine, 3 mg/g

4. INDICATION
Teat disinfection as part of a prevention strategy for mastitis in cattle.

5. CONTRAINDICATIONS
Do not use the product in case of known hypersensitivity to iodine or any of the excipients.

6. ADVERSE REACTION
None known. If you notice any serious effects not mentioned in this leaflet, please inform your veterinary surgeon.

7. TARGET SPECIES
Cattle (dairy).

8. DOSAGE FOR EACH SPECIES, ROUTE(S) AND METHOD OF ADMINISTRATION
The product is supplied ready to use as a teat dip. The dip cup should hold at least 5ml of dip. Dip each teat immediately after milking. Ensure that the teat is completely covered to three quarters of its length. The Dip cup should be replenished as necessary. The dip cup should be emptied after treatment and washed before reuse. The product is meant to be used as a post-milking teat dip up to two times per day. If signs of disease appear or persist, consult a veterinary surgeon.

9. WITHDRAWAL PERIOD

Meat & offal: zero days

Milk: zero hours

10. SPECIAL STORAGE PRECAUTIONS

Keep out of the reach and sight of the children.

Store upright in the tightly closed original container

Protect from frost

If the product has frozen, thaw in a warm place and shake well before use

Protect from light

Do not use after the expiry date stated on the label

Shelf life after first opening the immediate packaging: To be used in the 6 months after first opening. When the container is broached (opened) for the first time, using the in-use shelf-life which is specified on this label, the date on which any product remaining in the container should be discarded should be worked out. This discard date should be written in the space provided on this label.

11. SPECIAL WARNING(S)

Can be used in lactating and pregnant cattle.

Do not mix with other chemicals.

This product is for topical application, significant absorption does not occur.

As a general precaution, it is advisable not to mix the product with other chemicals. This veterinary medicinal product must not be mixed with other veterinary medicinal products.

1. Special precautions for use in animals

- For animal treatment only
- For external use only
- Use for the treatment of teats with cutaneous lesions may delay wound-healing. It is recommended to discontinue the treatment until lesions are healed.

2. Operators Warning

- Avoid contact with eyes. If splashed in the eye, rinse with clean running water and seek medical advice.
- In case of ingestion, drink large quantities of water and seek medical attention immediately.
- Keep away from food and animal feed.
- Wash hands after use.
- Iodine has an allergic potential. Persons with known iodine hypersensitivity must not handle the product.

12. SPECIAL PRECAUTIONS FOR THE DISPOSAL OF UNUSED PRODUCT OR WASTE MATERIAL, IF ANY

Any unused veterinary medicinal product or waste materials derived from such veterinary medicinal product should be disposed of in accordance with local requirements.

Kenostart should not enter water courses as this is dangerous for aquatic organisms.

UK only: To dispose of unused product to land, you must have an authorization under the Groundwater Regulations 1998. Dispose of any unused product and empty containers in accordance with guidance from your local waste regulation authority.
